The *WINGS* Industry Network Announces its First "Insights" Live Broadcast

For immediate release May 25, 2021

The *WINGS* Industry Network (WIN), previously known as the *WINGS* Industry Advisory Committee (WIAC), today announced June 2, 2021 at 1900 CDT for the first *WINGS* Industry Network Insights live broadcast. This broadcast and the archived version are eligible for FAA Safety Team ***WINGS*** Pilot Proficiency Program continuing education credits.

The program, REDBIRD "State of Flight Training 2021 Survey and Report" will be presented by Josh Harnagel, CFII, MEI and Redbird Flight Simulations VP of Marketing. He will present a comprehensive overview of their State of Flight Training Survey results. Mr. Harnagel said, "Despite the unprecedented year we just faced, the flight training industry is thriving, and the future looks brighter than it has in decades. This presentation will provide the benchmarks and insights to help the industry grow and its customers succeed while improving safety." The data presented is based on over 2,400 responses from instructors, students, and flight training providers.

The WIN Insights program introduces the general aviation community to the breadth of safety programs and practices offered by industry members. These organizations have safety initiatives as a core value supporting their business operations. Each program will feature an expert representative from industry to educate viewers on how the roll of safety became a vital aspect of their businesses, how safety fits in their goals and objectives, and how they developed these programs to the benefit of the aviation community.

WIAC Founder and WIN Director of Business Development, Paul Burger said, “I am very proud of the work the WIN directors, and members have done to help bring these broadcasts to fruition.” Upcoming broadcasts will feature FSANA, SAFE, NAFI, and Avemco to share their safety initiatives with the broader aviation community. Paul started the WIAC over 20 years ago with the steadfast vision to do whatever he could to reduce the GA accident and incident rate following the tragic loss of dear friends in an aircraft accident.

****

The *WINGS* Industry Network is a coalition of industry members dedicated to general aviation safety. Its vision is to reduce the general aviation accident rate through participation in the FAA Safety Team ***WINGS*** Pilot Proficiency Program. The network of aviation industry members and the FAA Safety Team are committed to enhancing aviation safety through pilot and aviation maintenance technician proficiency. We stand by the important concept: "When it comes to safety, we cooperate we don’t compete."
